PROFILE

Solution-focused web developer with experience in web-based applications. I have participated in both Back-end and Front-end development. I support the objectives and strategies both in programming, as well as in the layout and design of it. Ready to learn and implement new technologies on a daily basis. Always willing to learn something new.

WORK EXPERIENCE

Back-end Programmer, La voz de Michoacán

***Morelia*, Michoacán |** 2022 – Currently

- Analysis of requirements for the development of the project.
- Interface development using tailwindCSS.
- Development of routes, validations, generation of local data, database with MYSQL.
- Use of livewire and jetstream framework to give greater dynamism.

Front-end Developer Intern, LOCLOG, Morelia

Morelia, Michoacán | January 2 0 2 2 — April 2 0 2 2

- Development of views, with dynamism done with angular directives and functionality with JavaScript.
- I attended intensive training angular and React to acquire the necessary knowledge for the development of the project (point of sale).
- Create REST API requests, Service, Observables.
